

Evacuated Tube

Length	1975mm
Width	1190mm
Height (including frame)	1410mm
Weight	43kg
Gross Area	1.92m ²
Aperture Area	1.395m ²
Absorber Area	1.2m ²
Material	Borosilicate glass
Outer Tube Diameter	58mm
Inner Tube Diameter	47mm
Glass Thickness	1.5mm
Length of tubes	1800mm
Distance between tubes	75mm
No. of tubes	15
Max. Pressure	12 bar
Operating Pressure	6 bar
Max. Operating Temp.	110°C
Recommended tilt	Angle of Latitude
Recommended flow rate	300l/m ² h
Output (Approx.)	580kWh/m ² /yr

- Modular design for ease of installation
- High yields for low dimensions
- High quality vacuum tubes
- Full accreditation
- Low Cost
- Quick payback period

Panels can easily be mounted on either a slate or flat roof using the kits provided.
